PRODUCT DESCRIPTION

AJS 1923 349 cc side valve Model B 1 frame# 30781 engine# 5096 S

The four Stevens brothers had been in motorcycle manufacturing since the final years of the 19th century, but only in 1911 their first complete "AJS" motorcycle, a 298 cc twospeeder, was marketed.

For the 1912 season their first V- twin, the model D, was brought out.

In the 1914 Junior TT a magnificent first and second place was scored.

The company moved to new premises at Graiseley House, Wolverhampton. The 1915 range consisted out of three models; the sporty 2 ¾ HP single, the medium weight 4 HP (550 cc) twin model A and as top of the range the 6 HP model D.

In the following years both the single and the big twin became very popular machines.

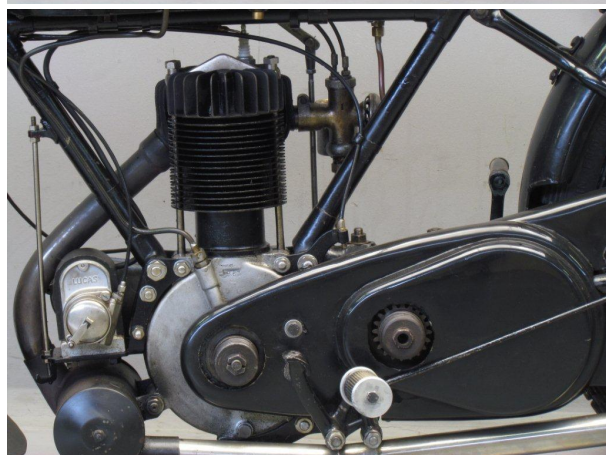

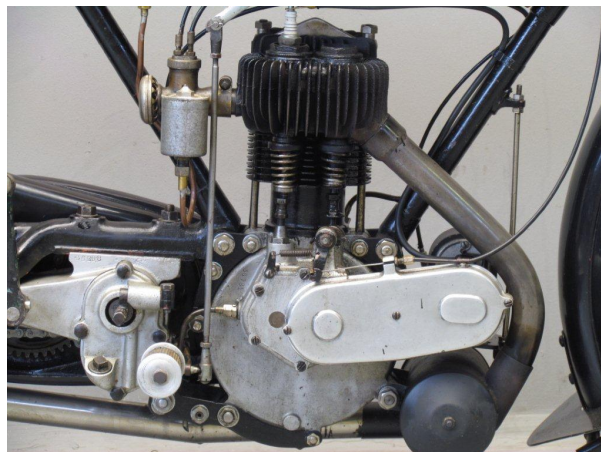

In the 1923 range two side valve singles were offered, a Standard Touring Model (B) and a Standard Sporting Model. (B 1)

The machine has a quickly detachable rear wheel and internal expanding front and rear brakes, which is quite advanced for 1923.

This practical vintage motorcycle is an older restoration and in a still very well presented condition.
