PRODUCT DESCRIPTION

AJS 1928 Model K 8 498 cc ohv frame# K 93549 engine# K 8 935 4 9

The four Stevens brothers had been in motorcycle manufacturing since the final years of the 19th century, but only in 1911 their first complete "AJS" motorcycle, a 298 cc two speeder, was marketed.

For the 1912 season their first V- twin, the model D, was brought out. In the 1914 Junior TT a magnificent first and second place was scored.

From 1925 on prefixes were used to the numbering system: E=1925, G=1926, H=1927 K= 1928. The 500cc OHV model was introduced for the 1925 TT races; it made a big impression by making the fastest lap in history (till then that is) at a speed of 68.97 mph.

It was first catalogued for the 1926 season as the Model G 8.

For 1928 no less than eleven models were catalogued, ranging from a 250 cc side valve to a 799 cc V- twin.

Bore and stroke dimensions are 84x90 mm, carburettor is Binks with twist grip control and a Bosch magdyno provides the spark and the lighting.

The cylinder head is detachable and lubrication is by mechanical oil pump and auxiliary hand pump.

This machine is a well-detailed older restoration.
