PRODUCT DESCRIPTION

Harley-Davidson 1920 989 cc IOE V-twin model "F" engine # 20 T 11543

It took the Harley-Davidson Co. about 12 years to develop their motorcycles from a single cylinder belt driven single 3 HP machine to the 45 degree V-twin with 3-speed countershaft gearbox that was marketed in 1915.

This sturdy 989 cc (84x89mm) machine became a popular choice for motorcycle buyers all over the world, private enthusiasts as well as police forces, postal services and other government bodies.

The twin could be ordered with magneto ignition ("F") or battery and coil ignition ("J").

The engine delivered 17 HP @ approx. 3,200 rpm.

The OHV inlet, side valve exhaust concept was used till 1930, when HD chose the full side valve engine concept.

In 1920 a new factory building was completed; this made HD the largest motorcycle factory in the world with 2,400 employees and established dealerships in 67 countries.

Harley-Davidsons were fast becoming famous for their power, comfort and reliability.

This 1920 Harley Davidson model "F" needs refurbishing before putting her back on the road again.
