PRODUCT DESCRIPTION

Harley-Davidson 1924 989 cc IOE V-twin model "JE" engine # 24JE 11848 Frame number 24JE 11848

It took the Harley-Davidson Co. about 12 years to develop their motorcycles from a single cylinder belt driven single 3 HP machine to the 45 degree V-twin with 3-speed countershaft gearbox that was marketed in 1915. This sturdy 989 cc (84x89mm) machine became a popular choice for motorcycle buyers all over the world, private enthusiasts as well as police forces, postal services and other government bodies: in 1924 more than 1400 law enforcement agencies in the U.S. alone were equipped with HD motorcycles.

1924 was not a good year for the firm: the losses amounted to almost \$ 120,000 and the workforce was trimmed down from 2500 to 1000 employees.

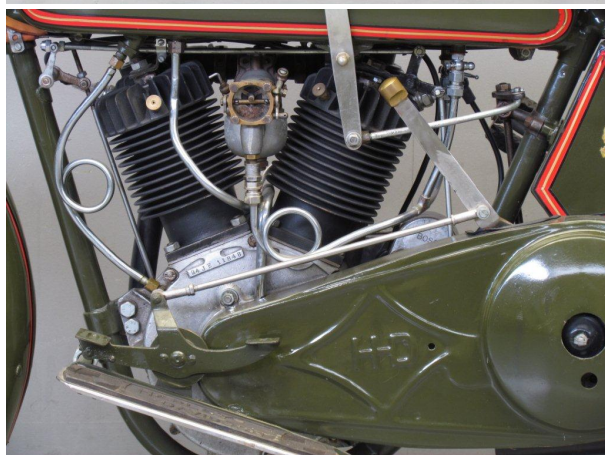

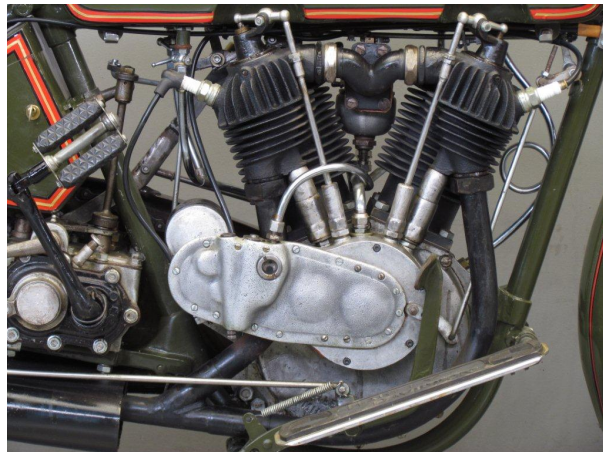

More than 6000 machines were exported overseas this year; this amounts to almost half of all Harleys manufactured.

New features for 1924 were a box-shaped silencer and the installation of Alemite grease fittings. With every new motorcycle an Alemite grease gun and a can of grease was supplied.

This machine is a nice older restoration
