PRODUCT DESCRIPTION

Harley-Davidson 1925 1212 cc IOE V-twin frame & engine# 25 JDCB 10333

From model year 1921 the factory markets a 74 cu. (1212 cc) model (bore x stroke 87.4x101.6mm) alongside the 60 cu. (989 cc) machines to cater for the sidecar enthusiasts.

Model year 1925 looks completely different from the older models: a new type of frame causes the saddle position to be 3 inches lower than before, the wheels are smaller in diameter and the petrol tank gets a “dynamic” teardrop shape. All in all these new models look much more modern than their predecessors.

In 1925 Harley Davidson sells about 15,000 motorcycles, more than 60% of this output are 1212 cc models.

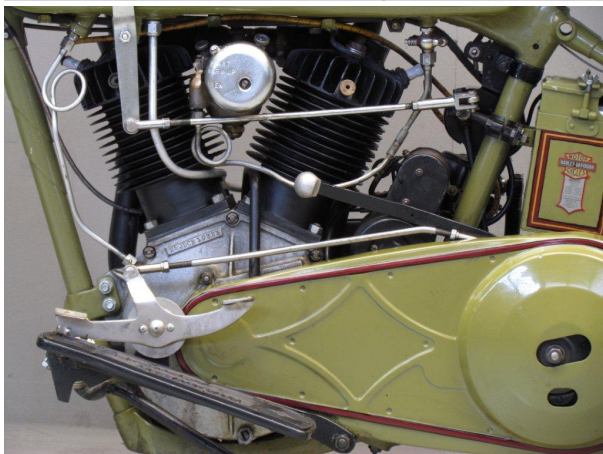

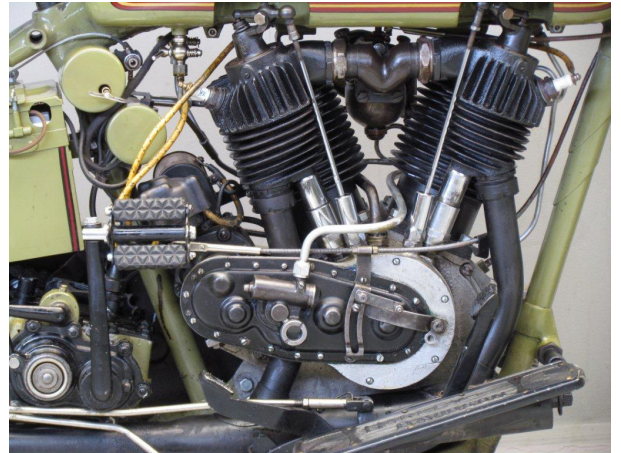

Compression ratio is 3,7:1, power output 16 SAE HP @ 3,600rpm.

The unladen weight is 180 kg and the petrol tank holds no less than 20 litres.

This nice machine has been restored a some years ago.
