### PRODUCT DESCRIPTION

**Harley-Davidson 1927 model JD 1200 cc IOE combination frame # 2711**

**engine #27 JD 5163**

Harley-Davidson used the OHV inlet, side valve exhaust concept till 1930, when the company chose the full side valve engine concept.

For 1927, no more than 3561 1000cc model J machines were sold; the 1200 cc JD was much more in demand with 9691 units leaving the factory.

Not surprisingly perhaps, as the price difference between these models was a mere \$10.

1927 was the first year of the “wasted spark” distributorless ignition system using a circuit breaker and a single coil firing both spark plugs at once.

This well-restored combination comes complete with Johns-Manville speedometer.
