PRODUCT DESCRIPTION

Harley davidson 1932 "V" 1208 cc side valve V-twin frame # 15227 engine #32 V 1310 C

In 1930 the Model "V" came on the market to replace the F-head models J and JD.

The model "V" was a medium compression model, the "VL" was its high-compression brother, designed for sidecar and package truck use. The "VL" produced some 30 HP and it was the top of the line for Harley-Davidson customers in the 30s. In 1936 the VL was replaced by a heavier model, the 80 cu inch (1340 cc) VLH.

That machine produced 34 HP and weighed 247 kg.

The "V" had a power output of 28 HP @ 4000 rpm.

Some of the new features for the 1932 model year were: new cylinders that gave improved airflow for better cooling and strengthened front forks .

This machine comes complete with accessory spotlight.

It has been well-restored a number of years ago and is a strong runner.
