PRODUCT DESCRIPTION

Indian 1915 7 HP "Model C 3" 994 cc IOE V-twin engine # 82G592 gearbox # K 3010

Indian's first, 38.61ci (633cc) v-twin appeared in 1907 with an engine clearly derived from that of the single, though mechanical inlet valves - introduced for 1908 - were an early improvement. The twin's rear cylinder continued to form part of the frame until 1909 when a loop frame of the type favoured by rivals Harley-Davidson was adopted.

The Springfield Company's first 'Big Twin' debuted that same year displacing 61 ci. By 1913 Indian was the largest motorcycle manufacturer in the world; the 1913 production was almost 32,000 machines. There were 2,000 dealers all over the world and Indian controlled some 42% of the domestic motorcycle market in the USA, according to a company claim.

For 1915 about 10 models were offered, among which featured a couple of lighter twins that were designated "Little Twin".

Some new features for 1915 were the use of chrome-vanadium steel tubing and the option of a three speed gearbox.

The "Model C" was available in single speed and with 2 or 3 speed countershaft gearbox but in the British edition of the 1915 sales catalogue only the three speed model was offered.

This sturdy vintage 3-speed Indian has been refurbished and is in good condition throughout.
