PRODUCT DESCRIPTION

Indian 1941 741 500cc 2 cyl sv Frame 74121847 Engine nr GDA 22039

This model of the famous Indian make was designed in 1939 to be used in the US army and the armies of its allies.

The configuration is much like that of its bigger brother the 750 cc Military Scout (model 640 B), but the 500 is built lighter as regards to both frame and engine.

There are also many differences in detail.

The production ran for about 6 years till 1944.

In that period no significant changes were made in the 741's specification; about 35,000 machines were made.

Engine performance is about 15 HP at 4,800 rpm. Ignition is by battery and coil, (the B in the model designation points to battery /coil ignition) weight is 450 lb, top speed 65 mph.

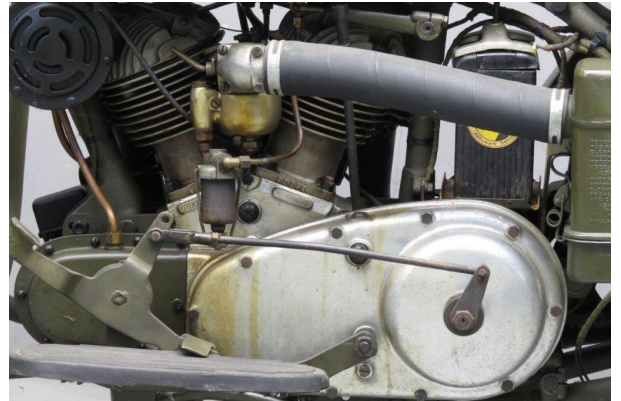

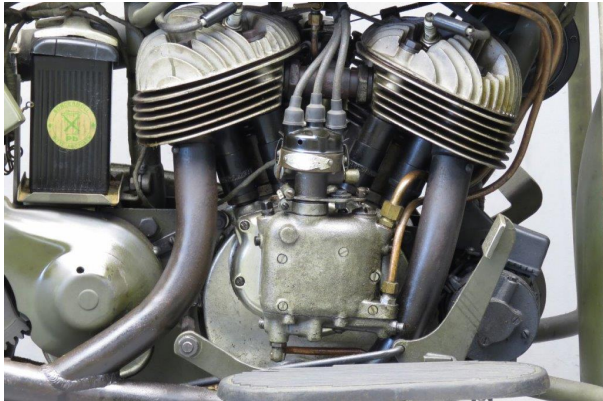

Transmission 3 speed hand shift, tyres 3.50 x 18.

In the December 2001 issue of the magazine of the Dutch Veteran Motorcycle Club you can find an excellent article (in Dutch!) by Lex van Essen on this interesting model. (info@vmcmotor.com)

The 6135 Miles on the odometer can well be the original mileage, as we noticed this bike to be in a very good unspoiled and hardly used condition.
