PRODUCT DESCRIPTION

Moser ca. 1920 2 ¼ HP 250 cc side valve frame#18593 engine#1503

Fritz Moser started of as a clock maker and from 1899 he worked for some years in the Zédel engine factory, that was based in St. Aubin, Switzerland. Moser started his own company there and brought out his fist motorcycle around 1905.

It was a side valve v twin with mechanically operated valves.

The machines were very successful in mountain racing events. Many other makes started using Moser engines and the company prospered.

In the early twenties light Moser engines were popular, for example the 125 and 175 cc ohv unit construction engines.

These machines were very economical with fuel and managed to set some world records: the 125 cc model was ridden 112 kilometres on one litre of petrol.

Another very impressive world record was set in 1926 by a Dollar with 125 Moser engine.

This little machine reached a top speed of almost 104 km/hour.

In the 1930s the company was taken over by Allegro.

This neat little machine has a 3 speed Burman gearbox and secondary belt transmission.
