PRODUCT DESCRIPTION

Sarolea 1928 350 cc OHV Model "25 N" Supersports frame# 26922 engine#26922

The firm was established in 1850 at Herstal(Liege) as an arms factory by Joseph Saroléa.

In 1892 the production of bicycles was started.

Joseph died in 1894 and under the management of his sons the company grew bigger and bigger. In the early years of the new century the company started to develop motorized bicycles and soon Saroléa was a force to reckon with: around 1907 the firm employed some 200 labourers and had 4000 m2 of production facilities.

In the early years of the century Saroléas were sold in Britain under the "Kerry" brand.. Both singles and V twins were made and the firm supplied engines to a number of firms in several countries. In turn, Saroléa used a number of British components such as Sturmey Archer gearboxes and AMAC carburettors.

In the 20s the firm got successfully involved with long distance runs, reliability trials and hill climbs.

From 1927 on the company made its own gearboxes.

In 1928 a greatly enlarged front wheel brake was featured.

This "25 N" Supersports has been restored by a Saroléa enthusiast and is in excellent shape.
