PRODUCT DESCRIPTION

Sunbeam 1922 599 cc 4 ¼ HP side valve single combination frame#42752 engine# 166/19117

For 1922 two new models were listed, the “Longstroke “ in TT model form and a model which combined the longstroke bottom half and old pattern 3 ½ HP cylinder, giving bore and stroke measurements of 88x105.5 . This 4 ¼ HP model, primarily intended for sidecar use, was named “model 7” from the 1924 sales season and it stayed in production till the early thirties.

It was a splendid “slogger” which pulled great weights and lasted seemingly forever.

A 1922 4 ¼ HP machine was mentioned in Bob Cordon Champ’s excellent book “The Sunbeam Motorcycle”.

I quote: ” It was on a machine such as this that a man could carry out his entire riding career and many did.

One such, the man who inspired the writing of this book, I would like to commemorate here.

George Burrow, an ex RFC farmer from Worcestershire, bought his 4 ¼ HP model OK 6428 from a catalogue in 1922 and rode it till his death in 1970. (...)” The machine has leaf sprung front forks and rear drum brake.

For safety reasons a drum brake has been fitted to the front wheel.

This combination has been restored meticulously.
