### PRODUCT DESCRIPTION

**Wanderer 1915 504 cc "4PS" V-twin side valve frame# 290799**

Wanderer motor cycles were manufactured in the German town of Chemnitz between 1902 and 1929. The Wanderer company also built high-quality bicycles, typewriters, mechanical calculators and cars. In the early twenties the firm employed more than 6000 labourers.

Wanderer motorcycles had an excellent reputation; they were sturdily built and their finish was first class.

Between 1914 and 1918 the German army used many Wanderers.

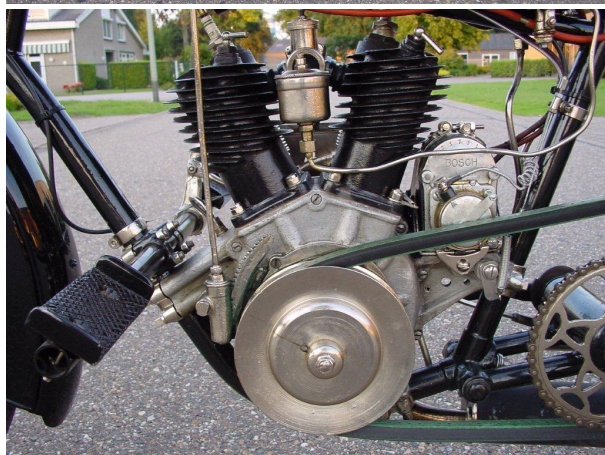

The company used both single cylinder and unit construction V-twin engines of their own manufacture. This ca. 1915 model with bore and stroke dimensions of 65x76 mm has both front and rear suspension and two speed hub gear with free engine position.

The machine is well restored, equipped with tank top controlled belt tensioner and has a nice period acetylene lighting set.
