ANTIQUE MOTORCYCLES - ACCESSORIES AND RELATED ITEMS

PRODUCT DESCRIPTION

Wanderer ca. 1920 "Model 616" 616 cc side valve V-twin frame # 31027 engine # 27725

Wanderer motor cycles were manufactured in the German town of Chemnitz between 1902 and 1929. The Wanderer company also built high-quality bicycles, typewriters, mechanical calculators and cars.

In the early twenties the firm employed more than 6000 labourers.

Wanderer motorcycles had an excellent reputation; they were sturdily built and their finish was first class.

Between 1914 and 1918 the German army used many Wanderers.

The company used both single cylinder and unit construction V-twin engines of their own manufacture.

In the twenties Wanderer was successful in racing, especially with their 8-valve OHV V-twin.

In 1929 the Czech manufacturer of arms Janecek bought the licence of the Wanderer design and started producing motorcycles under the JAWA (Janecek and Wanderer) trademark.

This well-restored 616 was originally sold in Denmark and has been in one family from new.
