### PRODUCT DESCRIPTION

**Wanderer 1922 616 cc side valve V-twin    frame # 22770    engine # 26066**

Wanderer motor cycles were manufactured in the German town of Chemnitz between 1902 and 1929. The Wanderer company also built high-quality bicycles, typewriters, mechanical calculators and cars.

In the early twenties the firm employed more than 6000 labourers.

Wanderer motorcycles had an excellent reputation; they were sturdily built and their finish was first class.

Between 1914 and 1918 the German army used many Wanderers.

The company used both single cylinder and unit construction V-twin engines of their own manufacture. In the twenties Wanderer was successful in racing, especially with their 8-valve OHV V-twin. In 1929 the Czech manufacturer of arms Janecek bought the licence of the Wanderer design and started producing motorcycles under the JAWA ( Janecek and Wanderer) trademark.

This "Model 616" is a well restored machine.
